

Barcode Studio

Advanced Barcode Maker

Windows, Mac OS X, Linux

Create Barcodes Immediately

For Desktop Publishing and Pre-Press Applications

Barcode Image Creator

Barcode Studio generates high-quality bar code images within minutes. Additional software or special know-how is not required.

Vector and Raster Images

Barcode Studio is perfectly suited for demanding desktop publishing, pre-press, print-shop and artwork applications.

Barcode Studio exports the created bar codes as vector-based PDF and EPS (Encapsulated PostScript®) images. Raster formats like PNG, BMP, JPG, GIF and TIFF are supported in addition.

Integrated Quality Assurance

Barcode Studio guarantees a perfect quality of the generated bar code images. The estimated bar code quality is displayed during the design of a symbol. Time-consuming and costly test runs are eliminated.

More Than 100 Barcodes

All bar code requirements are covered: *Barcode Studio* 1D creates linear barcodes like UPC, EAN, GS1 DataBar and codes for postal applications. The 2D license additionally supports 2D codes like QR-Code, Data Matrix, PDF417, DotCode, Han Xin, stacked and GS1 composite symbols.

Easy Operation

The intuitive user interface makes it easy to adjust all barcode related parameters with a few mouse clicks. An assistant offers specialized support for creating correct GS1 barcodes or vCard, meCard and URL codes for mobile tagging applications.

For automation purposes *Barcode Studio* offers a full-featured command line interface in addition.

Data Import

Barcode Studio generates single bar codes or a series of bar code symbols – each one with different data. The data to be encoded is specified manually or imported from external text or CSV files.

Highlights

General

- **All Barcodes**
Supports more than 100 symbologies in total: EAN, UPC, Code128, 2of5, PDF417, DataMatrix (ECC200), Maxicode, QR-Code, Codablock, EAN-UCC-Composite, RSS, GS1 DataBar, Aztec, Han Xin, DotCode, ...
- **100% Standard Compliance**
ECI, check digits, data compression, Asian character sets, Unicode encoding, structured append, ...
- **Data Import and Serial Numbers**
Create or import series of bar code data
- **Label Printing**
Print barcode labels with additional text
- **Output Formats**
Direct printing, image export, PostScript®, PCL®, PDF, EPS
- **Fine-Grained Barcode Control**
All relevant bar code parameters are adjustable
- **Compliance Bar-Coding Templates**
Templates for EAN, UPC and Deutsche Post codes
- **Quality Control**
Integrated output quality estimation

Areas of Application

- **Pre-Press**
Generate bar code images in perfect quality.
- **Desktop-Publishing**
- **Bar Code Images**
Batch creation of bar code images with data from external files.
- **Optimized for HP Indigo® Printing Systems**
