TBarCode/Embedded

Barcode Print Server

Robust Network Solution for Barcode Printing

A Cooperation between SEH and TEC-IT

Solution for Centralized Barcode-Printing

You are looking for an enterprise-wide, unified bar code printing solution in combination with robust core services for printing and spooling?

The solution is simple: Use SEH's Print & Spool Appliances *ISD300*, *ISD400* or *ISD410* in combination with TEC-IT's *TBarCode/Embedded*.

An *ISD* is a highly efficient, out-of-the-box spooling device. Together with *TBarCode/Embedded* users take advantage of completely device independent bar code printing.

Easy Installation, Minimal Maintenance

An *ISD* and *TBarCode/Embedded* are installed within minutes – even in large company networks. The solution turns each PostScript® or PCL® compatible printer into a bar-code enabled output device. The solution is administered centrally. No special know-how is required.

Independent from Manufacturer and Model

TBarCode/Embedded enhances devices compatible with PostScript® or PCL® with bar code printing. Bar codes are generated and printed completely independent from manufacturer or model. More than 100 different symbologies are supported.

TBarCode/Embedded offers plug & play bar-coding - without per printer costs, without hardware dependencies and without forced hardware replacements due to model changes.

For all Applications and Systems

TBarCode/Embedded and *ISD* spooling devices offer printing and bar-coding in a completely transparent manner. It can be used with all types of applications (e.g. SAP® R/3® or ORACLE®) and all operating systems.

Highlights

Enterprise Bar Code Printing

- *Seamless Integration*
  The combination of ISD300, ISD4100 or ISD410 with TBarCode/Embedded offers reliable spool and barcode enabled printing services.
- *Printer Independent*
  TBarCode/Embedded enhances all printers compatible with PostScript® or PCL® with bar coding features. No additional SIMM's or DIMM's are required.
- *Secures Investments*
  No additional costs are to be expected when changing printer types or printer models.
- *Unified Bar-Coding*
  Barcode functionality offered by the ISD300 in combination with TBarCode/Embedded is available within the complete network.

Bar Code Support

- *More than 100 Linear, 2D and Composite Codes*
  PDF417, MicroPDF, DataMatrix (ECC200), MaxiCode, QR-Code, Codablock, EAN-UCC-Composite, RSS, GS1 DataBar, Aztec, ...
- *PCL and PostScript Printers*
  TBarCode/Embedded works with all PostScript- and PCL data streams.
