# TFORMer

Report Generator for Software Developers

Printed and Electronic Documents in Custom Applications

TFORMer Designer

Full-featured design and output of dynamic document layouts is available with *TFORMer Designer.* It is the solution of choice for all type of documents and presents all features in an easy-to-use graphical interface.

TFORMer Designer offers fast end versatile document layout, high flexibility due to scripting features and complete industry compliance with bar-code support. Characteristics of both label-printing tools and reporting generators are combined. Dynamic document layouts – adapting to current input data – are created easily.

Various output formats for printing and storing documents cover all customer needs.

TFORMer Runtime

Software developers benefit from *TFORMer Runtime*. This reporting-engine can be integrated in custom applications. *TFORMer Runtime* generates or prints documents by combining layouts created with *TFORMer Designer* and print data supplied by a custom application or a database. The output format of the documents is freely adjustable and completely independent from the underlying document layout.

TFORMer Runtime is available as DLL (Dynamic Link Library), as Microsoft ActiveX®-Control, as static library or as stand-alone executable. Current operating systems like Microsoft® Windows®, UNIX® and LINUX® are supported.

Highlights

- **Direct Printing**
  Integrating *TFORMer Runtime* adds professional output and reporting-features to your application

- **Powerful Document Layouts**
  Document layouts and label templates are created without special knowledge

- **Dynamic Documents**
  Add dynamic features to your document layouts: computations, conditional printing, documents layers, variable data fields, tray control, etc.

- **Arbitrary Output Formats**
  Generate documents with bar-code support for direct printing, as PostScript®, PDF, HTML, text or as image formats.

- **Integrated Bar-Codes**
  Full-featured support of more than 70 bar-code symbologies (linear codes, 2D-codes, stacked and composite codes)

- **Reusability**
  Document layouts, output device and input data are complete decoupled. Reuse document layouts without limitations.

- **UNICODE and Bitmap Support**

- **Ready-To-Use Document Templates**
  TFORMer Designer comes with label and document templates for VDA, Odette, Gallia, AIAG, TNT, DHL, FedEx, UPS, ...

- **Operating System Independent**
  TFORMer Runtime is available for Microsoft® Windows® and for LINUX® or UNIX® flavors

- **Open Interfaces**
  TFORMer works without proprietary binary file-formats. XML is used for all configuration and layout data.
