

Trierenberg-Holding

Unified Labeling & Printing System
developed by TEC-IT

TFORMer Server, the industry-strength output solution from TEC-IT, in use worldwide at Trierenberg-Holding facilities.

Thin(k) Printing...

The Trierenberg-Holding, one of the biggest producers of thin printing papers worldwide with paper production facilities in several countries trusts in the output solution from TEC-IT (www.tec-it.com).

TFORMer Server, a software product from TEC-IT, is used in facilities of the holding to print millions of complex product labels each year.

...with TFORMer Server

TFORMer Server is a stand-alone output solution. It performs fully automated document creation and document distribution to adjustable output devices. Document or label layouts are created graphically with *TFORMer Designer*.

The product family *TFORMer* was designed with industry requirements in mind. *TFORMer Server* operates completely unsupervised, 24 hours a day in the production facilities of the Trierenberg-Holding. It prints complex product labels, meeting the ever increasing customer requirements in the area of product labeling and product identification.

Complex Labels and Barcodes

A notable feature of *TFORMer Server* is the extensive barcode support offered. No expensive special-purpose printers are needed. The software supports the generation of complex 2D bar codes (like PDF417 or DataMatrix).

In addition, labels can be designed or customized without adapting superordinate ERP applications. The label design process and the label printing process are entirely independent from data layout and ERP-functionality.

Advantages

The Trierenberg-Holding, headquartered in Austria, benefits especially from the device and ERP-system independency offered by *TFORMer Server*. Besides this, *TFORMer Server* stands for quick and reliable printing while offering versatile document layout capabilities including complete barcode support.

Customer requirements with respect to product labeling are met easily, thus enabling Trierenberg-Holding to increase their customer satisfaction while saving time and money.
