

## Barcode Studio

Advanced Barcode Maker

Single and Serial Barcodes

Windows, Mac OS X, Linux

Create Bar-Codes Immediately

For Desktop Publishing and Pre-Press Applications

### Barcode Image Creator

*Barcode Studio* generates high-quality bar code images for pre-press requirements and for desktop publishing applications within minutes. *Barcode Studio* operates on its own, no additional software is required.

### Versatile Output Formats

*Barcode Studio* exports bar code images in different formats like BMP, JPG, GIF and TIFF. In addition it supports generation of vector-based WMF, PDF and EPS (Encapsulated PostScript®).

*Barcode Studio* is therefore perfectly suited for high quality requirements in pre-press applications, printshops and in artwork studios.

### Quality Preview

*Barcode Studio* guarantees perfect quality of the generated bar code images. Time-consuming and costly test runs are eliminated.

The bar code quality is computed and displayed during the design of a bar code symbol. The adjusted bar code symbology, the symbol size, the encoded data and the resolution of the output media are taken into account for quality estimation.

### All Bar Codes and Mobile Tags

More than 100 different symbologies are supported. Besides linear barcodes the product generates complex 2D codes, stacked codes and GS1 DataBar composite codes. Common barcodes for mobile marketing and mobile tagging are included.

### Easy Operation

The intuitive user interface makes it easy to adjust all bar-code related parameters with a few mouse-clicks. For automation purposes *Barcode Studio* offers a full-featured command line interface in addition.

### Single Bar Code or Bar Code Series

*Barcode Studio* generates single bar codes or a series of bar code symbols – each one with different data. The data to be encoded is specified manually or imported from external text or CSV files.

### Highlights

#### General

- **Creates all barcodes:** linear, 2D, GS1, composite PDF417, MicroPDF, DataMatrix (ECC200), MaxiCode, QR-Code, Micro QR-Code, Codablock, EAN-UCC-Composite, RSS, GS1 DataBar, Aztec, ...
- **100% Standard Compliance**  
ECI, check digits, data compression, Asian character sets, Unicode encoding, macro bar codes, ...
- **Data Import and Serial Numbers**  
Create or import series of bar code data
- **Output Formats**  
Direct printing, image export, PostScript®, PCL®, PDF, EPS.
- **Fine grained Barcode Control**  
All relevant bar code parameters are adjustable.
- **Compliance Bar Coding Templates**  
Templates for EAN, UPC and Deutsche Post codes

#### Quality Control

- **Bar Code Quality**  
The output quality of the bar-code is constantly computed. The user is able to optimize the bar code image for readability.

#### Areas of Application

- **Pre-Press**  
Generate bar code images in perfect quality.
- **Desktop-Publishing**
- **Bar Code Images**  
Batch creation of bar code images with data from external files.
- **Mobile Marketing and Mobile Tagging**
- **Optimized for HP Indigo® Printing Systems**
