TEC-IT

2004 Form 1 MA0400111211
Massachusetts Resident Income Tax Return
FOR FULL YEAR RESIDENTS ONLY

Online Taxes Inc.

2D-Barcodes Accelerate Tax Returns

Online Taxes Inc. (USA), which provides federal and state online tax preparation and electronic filing for American taxpayers, uses know-how and products from TEC-IT.

Now US citizens receive possible tax returns more rapid.

Tax Services Online

Online-Taxes.com (**www.online-taxes.com**). is an authorized Internal Revenue Service e-file partner and provides individuals fast, secure and accurate online income tax returns for American taxpayers.

The data in the tax-refund forms generated online has to conform to stringent placement specifications. Annoying and costly delays are the consequence of incorrect or unreadable completed forms.

2D Barcodes

At Online-Taxes.com the problem was solved by using the know-how and barcode software of TEC-IT (**www.tec-it.com**).

PDF417 2D-Barcode

On every online form there is a 2D barcode which encodes the relevant tax data. An automated and error free acquisition of tax declarations is now possible. This accelerates the entire operational sequence and any repayments can be paid back more rapidly to the tax payer.

Barcode Generator TBarCode OCX

The TEC-IT product *TBarCode OCX* is a reusable software component for generating arbitrary linear or 2D-barcodes. It conforms to Microsoft's® ActiveX® specification and can therefore be embedded in numerous applications, development environments or server-based web-applications.

Thin Client Applications

Using such software components in web-applications on server-side has become a popular method because there is no need to install software on the client-side. The preinstalled web-browser is the only piece of software used on the client system for all interactions.

Online Taxes Inc. trusted in TEC-IT's *TBarCode OCX* because of the capabilities to be used server-side as well as the complete barcode support offered by the product.
