Office Barcode Add-In

TBarCode Office

This barcode add-in for Microsoft® Office (Word / Excel®) enables you to directly insert barcodes into arbitrary documents or spreadsheets.

Maximum Usability

TBarCode Office integrates seamlessly into Microsoft® Word and Microsoft® Excel®. The add-in supports more than 100 barcode symbologies and with its intuitive user interface, it is really easy to use.

All barcodes are pre-configured according to industry standards, which makes this barcode add-in ideally suited for untrained users.

Maximum Quality

Barcodes are created in the highest possible quality and can be printed with all printers. Special printer extensions or barcode fonts are not required. Check-digits are computed automatically, advanced barcode parameters like the module width are freely adjustable.

Microsoft® Word

TBarCode Office installs a handy, easy-to-use barcode panel. With this panel, barcodes are inserted into Word documents in no time. The barcode add-in is also best suited for creating serial letters: Merge fields can be used in barcodes as desired.

Microsoft® Excel®

The barcode add-in integrates perfectly into Microsoft Excel as well; single barcodes, barcode lists or tables and product catalogues are reliably created.

Dynamically linking barcodes with the content of the spreadsheet is also supported. Cells or table columns are converted into barcodes with just a click. Whenever the content of the linked cell is changed, the barcode updates itself automatically.
